

USETHANOL™ Opens First Green Biofuel Station in Longview, WA – October 29

FOR IMMEDIATE RELEASE

Vancouver, WA, October 24, 2007 – US Ethanol, LLC and Wilcox & Flegel Oil Co. will open the first USETHANOL™ Biofuel Station at 11:00am PDT, Monday, October 29, 2007 at 416 Oregon Way, Longview, WA, 98632.

A Grand Opening Celebration and Ribbon Cutting Ceremony will be held at the new Biofuel Station with executives of US Ethanol, LLC and Wilcox & Flegel Oil Co. on hand. Local and state government officials will be invited along with numerous representatives of the Longview/Kelso and Vancouver business communities.

The USETHANOL™ Biofuel Station is believed to be the first such station in Western Washington and will kick off the establishment of at least twenty five locations along the I-5 corridor in Washington and Oregon at which USETHANOL™'s branded E85 product will be available to motorists who own flexible fuel vehicles.

Products available at the USETHANOL™ Biofuel Station include E85, unleaded regular, unleaded premium and B5 biodiesel. The unleaded gasoline products will contain ten percent ethanol by volume.

A recent study by the Argonne National Laboratory showed that the use of almost five billion gallons of ethanol by motorists in the United States last year resulted in a reduction of approximately eight million tons greenhouse gases. Since E85 has the highest oxygen content of motor vehicle fuels available today, it burns much cleaner than gasoline. E85 is believed to reduce ozone producing pollution by twenty percent and to reduce greenhouse gas emissions by thirty percent.

Together, US Ethanol, LLC and Wilcox & Flegel Oil Co. are committed to developing the I-5 corridor as a major market for clean, green, renewable fuels that will enhance your driving experience while maintaining the environment of the Pacific Northwest.

Elie Makad, Chairman and Chief Executive Officer of US Ethanol, LLC, and Chairman of Makad Global, stated "Together with Steve Wilcox, President of Wilcox & Flegel Oil Co. and one of our Board members, we are proud to be the

first to bring a branded renewable fuel outlet to the people of Western Washington. This is the beginning of our campaign to bring E85 to the forefront in the Pacific Northwest. As we often say, E85 represents ‘the power of clean energy.’”

To determine if a vehicle is E85 compatible, look inside the vehicle’s fuel door, consult the owner’s manual, or visit www.E85Fuel.com.

About US Ethanol, LLC:

US Ethanol, LLC is a privately held company based in Vancouver, WA. Through its wholly owned subsidiary, Northwest Renewable, LLC, it is building a 55 million gallon per year fuel ethanol production facility in Longview, WA. Its long term mission is to bring renewable fuels directly to the motorists of the Pacific Northwest. US Ethanol, LLC markets its ethanol under the trademarks USETHANOL™, USE™ and USE – E85™.
